Summary

I am an honest and hardworking young individual who loves technology, especially in the Aviation sector. I am a DevOps Engineering enthusiast willing to learn new technologies and grow professionally to create a more inclusive environment and a better world for all. I aspire to be a DevOps Engineer to help global enterprises scale up, reduce operational costs and increase productivity in the new digital era.

I have experience working with Nginx, Git, Docker, SonarQube, Grafana, Prometheus, and Amazon Web Services (EC2 and CodeDeploy).

I am passionate about my career, and I work with integrity. I believe in teamwork.
